

## Call for proposals GRIP

### Year 2024-2025

#### Introduction

Since 2021, GRIP has funded a number of interdisciplinary projects submitted by Université Paris Cité laboratories on the dynamics of globalization, particularly in terms of North-South and East-West linkages, the multipolarity of the world, the transformation of institutions and practices, and the importance of Asia in economic, commercial, social and cultural interdependencies.

GRIP is launching a new call for projects. We invite you to read the conditions and dates.

#### Expected projects

The call to fund projects in 2024 takes several different forms:

**Type 1:** Research projects involving cross-site field surveys (from a global perspective).

**Type 2:** Additional funding for research projects that have already received GRIP funding once. The extension proposal must present an explanation justifying this need, based on the results obtained during the first phase of the project (project funded and closed).

**Type 3:** Support for project formulation and contacts with international partners (seed funding), with a view to preparing funding applications to research agencies, including IDEX, ANR, ANRS, the European Union, etc.

**Type 4:** Organisation of seminars, colloquia and study days involving foreign speakers. These meetings must be held before the end of 2024, be open to the public, and may be held outside France. Those held in France must take place within the UPCité.

**Type 5:** Development projects. Proposals seeking support for publication (books, articles, journal articles), or other forms of presentation of the results obtained (films and documentaries, podcasts, etc.). This does not include papers presented at conferences, the organisation of sessions at international conferences, conferences of professional or disciplinary associations. Collective productions will be favoured.

- Proposals must contribute to the **structuring of GRIP**, either in line with GRIP's thematic axes, or by proposing themes that deviate from them but allow us to question the dynamics of globalization. In the latter case, applicants are invited to contact us before drafting their projects.
- Research projects must include an **interdisciplinary dimension**.
- Proposals may include missions by **foreign partners**. By partners we mean research teams.
- Proposals that **critically examine the intersection of Global Studies and global health issues are particularly welcome**.

### Conditions of eligibility

All applications must be submitted by a researcher or laboratory from Université Paris Cité or Alliance Sorbonne Paris Cité.

- The project must involve partners in two specific ways:
  - Involve at least one Université Paris Cité **or** Alliance Sorbonne Paris Cité research unit **with at least** one foreign partner.
  - Involve **at least one** research unit from Université Paris Cité **or** the Sorbonne Paris Cité Alliance **with** a French research unit outside the UPCité/Alliance SPC perimeter **and** at least one foreign partner.
- Other elements that may favour the application :
  - Participation of partners from Africa, Asia or Latin America
  - Participation of young researchers (PhD students and post-docs)
  - Interrogation at the intersection of Global Studies and global health
  - Inclusion of science-society activities

*NOTE: Candidates may apply for only one type of project.*

### Budget

The budget available for each application may range from :

- Up to 15,000€ for type 1 and 2 research projects
- Between 5,000€ and 10,000€ for type 3 and 4 projects
- Up to 5,000€ for development projects type 5

*NOTE: Budgets must be allocated to one of the research laboratories within the UPCité perimeter. Under no circumstances will it be possible to allocate this budget to any other laboratory.*

### Evaluation criteria

The evaluation criteria for the projects will take into account (in no particular order of priority) :

1. The quality and feasibility of the project
2. The extent to which the project is in line with GRIP's research areas / or opens up innovative themes (see above)
3. Contribution to GRIP's structure
4. The interdisciplinary nature of the project
5. The inclusion of young researchers and/or partners from Africa, Asia or Latin America
6. Interaction between science and society

### How to apply

To apply, please send your request with a short CV of the project leaders (2 pages maximum) and a project proposal (4 pages maximum) to: [grip\\_appel@tutanota.com](mailto:grip_appel@tutanota.com)

Proposals should include a description of the project, the participating institutions, how the project relates to GRIP's themes and an overall budget showing the share requested from GRIP.

### Timetable

- Launch of AAP: 06/03/2024
- AAP closing date: 30/03/2024
- AAP resolution: 22/04/2024
- Deadline for implementation of budget: 30/06/2025
